

Our Story

Middleton Taylor Consultancy (MTC) was formed to provide much needed services where a gap exists in the market. Issues with poor credit to debt management often leads to cashflow constraints and delays in the recovery of financial dues. MTC is here to assist in resolving these problems.

The Middle East's first Legal Risk Report

MIDDLETON TAYLOR
MANAGEMENT CONSULTANCY

Legal Risk Report

MTC introduces to the Middle East a revolutionary comprehensive Legal Risk Report. Check out our "TRIPLE A" approach to credit / debt management.

Triple A...

- Assess
- Analyse
- Act

Forearmed is forewarned!

Assess

The MTC Legal Risk Report helps you identify and mitigate potential problems. By utilising this tool, you gain insight into previous legal cases brought against an individual or business. This insight is invaluable when assessing both creditworthiness and when recovering debt.

Analyse

Once data is assessed the MTC Legal Risk Report will analyse data to provide a risk level indicator through our sophisticated software. This will provide an accurate assessment of the last 30 cases brought against the concerned company, allowing our clients to make informed business decisions.

Act

Resolve the problem based on up-to-date and accurate information with the help of MTC.

Our Experience

Wayne Taylor has accumulated decades of experience on company boards and in director positions, where he has been responsible for implementing rigorous procedures for cash flow and debt recovery. He has a track record of successfully opening and winning cases against companies for bad debt.

Mark Sayer has extensive experience in commercial management, resolving difficult accounts, and successfully managing major arbitrations and court disputes in the region. His expertise in risk management and contract drafting helps to limit future disputes for clients of MTCME. Mark is a fellow of the RICS and a qualified testifying expert witness.
